**Virtual Tour of Green Infrastructure
Practices in Hamilton County**

Project/Photo Submission Request

Would you like to see your project or green infrastructure practice featured on Hamilton County's Virtual GI Tour website?

The Hamilton County Water Quality Program is currently developing a list of projects and practices to be showcased on an online tour of the Hamilton County and Chattanooga area.

The goal is to provide an in-place view of practices and projects that feature innovative and effective green infrastructure stormwater practices in the

Chattanooga area.

A submittal form is available at www.hamiltontn.gov/waterquality. Along with a picture of the site, the name of the designing company and a site contact will be listed.

Practices will be sorted into the following categories:

- Bioretention
- Pervious Pavement
- Green Roof
- Infiltration
- Stream Restoration
- Rainwater Harvesting
